we care, you grow

BullenMast

Mineral feed for beef cattle

Main applications

- fattening cattle

Product features:

- high percentage of phosphorus
- a lot of magnesium
- sodium bicarbonate
- trace elements 25% as highly available glycine chelate
- Selen-Protect® (rumen protected)
- B-vitamins
- tasty herbs

Product advantages:

- high palatability and acceptance
- good supply of minerals and vitamins
- secure feed rations through essential nutrients and rumen stabilisation

Your benefits:

- Opimal supply and high performance of the bull
- economic success through healthy and calm animals with high daily weight gains
- high daily weight gain
- good feed conversion
- better animal health
- guaranteed supply thanks to JOSERA's specific recommendation of 10g/kg of dry matter (DM)

CARE

BullenMast

Mineral feed for beef cattle

Product features:
- high percentage of phosphorus
- a lot of magnesium
- sodium bicarbonate
- trace elements 25% as highly available glycine chelate
- Selen-Protect® (rumen protected)
- B-vitamins
- tasty herbs

Application recommendation:
For rations for fattening cattle with a high proportion of maize silage and cereals.

Feeding recommendation: Bullenmast is used for feed rations for cattle feeding with large amount of maize silage and grain.

Guideline:
- pre-fattening period: 100 g
- main fattening period: 130 g
- final fattening period: 100 g – 120 g

JOSERA Feeding Concept 100 for 1000
The mineral requirements of fattening cattle are largely determined by their daily weight gains. The JOSERA feeding concept for fattening cattle, ‚100 for 1000', is based on this principle and means that 100 grams of mineral feed are needed for every 1000 grams (1 kg) of daily weight gain. For example, with a daily gain of 1600 grams, 160 grams of mineral feed should be provided. This performance- and needs-based feeding ensures optimal growth for the animal while also avoiding environmentally harmful nutrient surpluses.

Instructions for proper use:
This complementary feed has a higher content of Vit. A, Vit. D3 and trace elements than complete feed, therefore it must be given to fattening cattle only in a quantity of 50-130 g and to calves (with functioning rumen) 20-50 g per animal and day.

10 g/kg TM

Composition:
calcium carbonate | sodium chloride | magnesium oxide | mono-calcium-phosphate | sodium bicarbonate | polymorphic algae lime | sugar beet molasses | wheat bran | products from the processing of herbs (peppermint, rosemary, oregano, camomile, lemon balm)

Analytical constituents:

21.00 %	calcium	2.00 %	phosphorus
7.00 %	sodium	5.00 %	magnesium
10.5 : 1	Ca/P =		

Nutritional additives per 1 kg:

500000 I.E.	vitamin A (3a672a)
120000 I.E.	vitamin D3 (3a671)
2000 mg	vitamin E/all-rac-alpha-tocopheryl acetate (3a700)
300 mg	vitamin B1 (3a821)
27 mg	vitamin B2 (3a825ii)
24 mg	vitamin B6/ pyridoxine hydrochloride (3a831)
500 mcg	vitamin B12 (3a835 / 3a836 / 3a837)
300 mg	niacinamide (3a315)
90 mg	calcium D-pantothenate (3a841)
7 mg	folic acid (3a316)
1500 mg	zinc (zinc chelate of glycine hydrate (solid)) (3b607)
4500 mg	zinc (zinc oxide) (3b603)
750 mg	manganese (manganese chelate of glycine hydrate) (3b506)
2250 mg	manganese (manganese (II) oxide) (3b502)
225 mg	copper (copper(II) chelate of glycine hydrate (solid)) (3b413)
675 mg	copper (copper(II) sulphate pentahydrate) (3b405)
100 mg	iodine (calcium iodate anhydrous) (3b202)
22 mg	cobalt (coated granulated cobalt(II)carbonate) (3b304)
15 mg	selenium (sodium selenite) (3b801)
15 mg	selenium (sodium selenite)(SeProtect®) (3b801)

Note: The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
