BullenProfi

Premium-mineral-feed for beef cattle

High weight gains, high slaughter yields, and good meat quality, combined with efficient feed conversion and low animal losses, are crucial factors for the profitability of bull fattening. Key factors for high biological performance in fattening cattle are, besides management, a well-functioning rumen, a low stress level, and an adequate supply of nutrients. In addition to optimal roughage, a balanced supply of active ingredients, such as minerals and vitamins, is also important.

BullenProfi brings you closer to the goal of maximizing feed intake capacity and achieving optimal feed conversion. Improved fiber digestibility, combined with a balanced supply of active ingredients, organic trace elements, and B-vitamins, promotes feed intake and utilization. Furthermore, BullenProfi ensures a stable rumen environment, enhances resilience, and improves muscle development.

Through the 100 for 1000 concept, a secure supply of an all-in-one mineral feed is guaranteed throughout the entire fattening process.

Main applications

- fattening cattle

Product advantages

- ✓ high palatability and acceptance
- ✓ especially suitable for rations with soy extraction meal
- ✓ secure feed rations through essential nutrients and rumen stabilisation
- ✓ all-in-one mineral feed
- ✓ optimal supply for the cattle due to the 100 for 1000 feeding recommendation

PERFORMANCE

BullenProfi

Premium-mineral-feed for beef cattle

Product features:
- with phosphorus
- a lot of magnesium
- live yeast
- trace elements 50% as highly available glycine chelate
- Selen-Protect® (rumen protected)
- high value of B-vitamins
- tasty herbs

Application recommendation:
BullenProfi is used in feed rations for cattle fattening with a high proportion of corn silage and cereals as well as protein supplementation with soybean meal.
pre fattening 120-160g
intermadiate fattening 160-200g
final fattening 150-120g

Feeding recommendation:
JOSERA feeding concept 100 for 1000
The mineral consumption of cattle is essentially determined by the amount of daily weight gain. Based on this, the JOSERA feeding concept for fattening cattle ‚100 for 1000' has been developed, meaning that 100g of mineral feed is necessary for 1000g of daily weight gain. At 1600g daily weight gain, 160g of mineral feed should be fed. Thanks to this performance-oriented and needs-based feeding, the animal is optimally supplied during growth and at the same time, environmentally harmful nutrient surpluses are avoided.

Instructions for proper use:
This complementary feed has a higher content of Vit. A, Vit. D3 and trace elements than complete feed, therefore it must be given to fattening cattle only in a quantity of 100-200 g per animal and day. 120 – 160 g receiver, 160 – 200 g grower, 120 – 150 g finisher.
Field of application: 100 g mineral feed per 1000 g daily weight gain.

Composition:
calcium carbonate | sodium chloride | magnesium oxide | mono-calcium-phosphate | magnesium phosphate | sugar beet molasses | wheat bran | products from the processing of herbs (peppermint, rosemary, oregano, camomile, lemon balm)

Analytical constituents:

22.50 %	calcium	1.50 %	phosphorus
6.00 %	sodium	6.50 %	magnesium
15.00 : 1	Ca/P =		

Additives:

400000 I.E.	vitamin A (3a672a)
100000 I.E.	vitamin D3 (3a671)
1500 mg	vitamin E/all-rac-alpha-tocopheryl acetate (3a700)
300 mg	vitamin B1 (3a821)
27 mg	vitamin B2 (3a825ii)
24 mg	vitamin B6/ pyridoxine hydrochloride (3a831)
1000 mcg	vitamin B12 (3a835 / 3a836 / 3a837)
750 mg	niacinamide (3a315)
90 mg	calcium D-pantothenate (3a841)
7 mg	folic acid (3a316)
2000 mg	zinc (zinc chelate of glycine hydrate (solid)) (3b607)
2000 mg	zinc (zinc oxide) (3b603)
1000 mg	manganese (manganese chelate of glycine hydrate) (3b506)
1000 mg	manganese (manganese (II) oxide) (3b502)
300 mg	copper (copper(II) chelate of glycine hydrate (solid)) (3b413)
300 mg	copper (copper(II) sulphate pentahydrate) (3b405)
75 mg	iodine (calcium iodate anhydrous) (3b202)
18 mg	cobalt (coated granulated cobalt(II)carbonate) (3b304)
10 mg	selenium (sodium selenite) (3b801)
10 mg	selenium (sodium selenite)(SeProtect®) (3b801)

Zootechnical additives per 1 kg:
200.0 x10^9 KBE Saccharomyces cerevisiae, CNCM I-4407 (4b1702)

Note: The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
