we care, you grow

BumiCal

Mineral supplement for beef cattle

Main applications

- fattening cattle

Product features:

- phosphorus-free
- trace elements 25% in the form of highly available glycine chelates
- Selen-Protect® (rumen-protected)
- B vitamins

Product advantages:

- good supply of minerals and vitamins
- All-in-one mineral feed
- especially suitable for phosphorus-rich feeds (e.g., rapeseed extraction meal)
- needs-based supply of fattening cattle through the 100 for 1,000 feeding recommendation

Your benefits:

- modern, sustainable feeding concept
- easy, needs-based feeding with an all-in-one mineral supplement
- economic success through healthy, calm animals with high daily weight gains

CARE

BumiCal

Mineral supplement for beef cattle

Product features:
- phosphorus-free
- trace elements 25% in the form of highly available glycine chelates
- Selen-Protect® (rumen-protected)
- B vitamins

Feeding recommendation:
BumiCal is used for feeding rations in beef cattle fattening with high proportions of maize silage and grain, as well as protein supplementation with rapeseed extraction meal.

JOSERA Feeding Concept 100 for 1000
The mineral nutrient requirements of fattening cattle are primarily determined by the level of daily weight gain. The JOSERA feeding concept for fattening cattle ‚100 for 1000' is based on this principle and means that 100g of mineral feed is required for 1000g of daily weight gain. For 1600g of daily weight gain, 160g of mineral feed should be given. Due to this performance- and needs-based feeding, the animal is optimally supplied during growth, while simultaneously avoiding environmentally harmful nutrient surpluses.

Instructions for proper use:
This complementary feed may only be fed to fattening cattle at 100–200 g and to young cattle at 50–120 g per animal per day due to its higher content of vitamin A, vitamin D3, and trace elements compared to complete feeds. Guideline for young cattle: 10 g of mineral feed per kg of dry matter intake; Guideline for fattening cattle: 100 g of mineral feed per 1,000 g of daily weight gain; 120–160 g during early fattening; 160–200 g during mid-fattening; 150–120 g during final fattening.

100 für 1000

Composition:
calcium carbonate | sodium chloride | magnesium oxide | sugar beet molasses | wheat bran

Analytical constituents:

22.50 %	calcium	0.00 %	phosphorus
10.00 %	sodium	4.00 %	magnesium

Nutritional additives per 1 kg:

400000 I.E.	vitamin A (3a672a)
80000 I.E.	vitamin D3 (3a671)
1000 mg	vitamin E/all-rac-alpha-tocopheryl acetate (3a700)
200 mg	vitamin B1 (3a821)
15 mg	vitamin B2 (3a825ii)
13 mg	vitamin B6/ pyridoxine hydrochloride (3a831)
240 mcg	vitamin B12 (3a835 / 3a836 / 3a837)
120 mg	niacinamide (3a315)
50 mg	calcium D-pantothenate (3a841)
4 mg	folic acid (3a316)
1000 mg	zinc (zinc chelate of glycine hydrate (solid)) (3b607)
3000 mg	zinc (zinc oxide) (3b603)
500 mg	manganese (manganese chelate of glycine hydrate) (3b506)
1500 mg	manganese (manganese (II) oxide) (3b502)
150 mg	copper (copper(II) chelate of glycine hydrate (solid)) (3b413)
450 mg	copper (copper(II) sulphate pentahydrate) (3b405)
75 mg	iodine (calcium iodate anhydrous) (3b202)
18 mg	cobalt (coated granulated cobalt(II)carbonate) (3b304)
10 mg	selenium (sodium selenite) (3b801)
10 mg	selenium (sodium selenite)(SeProtect®) (3b801)

Note: The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
