DairyAnion

Dietary complementary feed to reduce the risk of milk fever; mineral feed for dairy cows for pre-calving preparation

Targeted feeding before calving is essential to unlock the animal's full genetic potential while maintaining optimal health.
A two-phase dry cow feeding strategy, including a two- to three-week transition period, provides ideal conditions for success.
DairyAnion is a dietary complementary feed specifically formulated for this transition phase. It combines anionic salts with macro minerals, highly bioavailable vitamins, and trace elements.
DairyAnion is particularly suitable for rations high in calcium and phosphorus, especially those containing large amounts of rapeseed, alfalfa, or clover.
The innovative Keragen® Longlife formula, together with high levels of magnesium and vitamin D_3, supports calcium mobilization and utilization — helping to prevent deficiencies at the start of lactation.
High-quality nutrition for the pregnant cow also has a positive impact on the vitality of the newborn calf.

Main applications

- preparation for birth

KERAGEN Longlife®

Product advantages

- ✓ Fewer problems with downer cows, retained placenta, and displaced abomasum due to a stable calcium and mineral balance
- ✓ High performance due to optimal metabolic preparation for the new lactation
- ✓ Vital calves due to fully stocked nutrient reserves at birth and high-quality colostrum

DairyAnion

Dietary complementary feed to reduce the risk of milk fever; mineral feed for dairy cows for pre-calving

What is Keragen Longlife®?

Keragen Longlife® is a balanced combination of various high-quality active ingredients designed to support udder and hoof health, as well as promote a stable and resilient metabolism. Keragen Longlife® contains:
Glycine chelates (organically bound trace elements)
Se-Protect® (rumen-protected selenium by JOSERA)
B-Protect® (rumen-stable B vitamins by JOSERA)
Biotin, Vitamin E, and more...

KERAGEN Longlife®

Product features:
- Combination of various anionic salts
- Keragen Longlife®
- High vitamin D_3 content
- High vitamin E content
- High magnesium content
- Highly bioavailable organic trace elements (glycine chelates)
- Rumen-stable selenium (Se-Protect®)
- Rumen-stable B vitamins (B-Protect®)
- Biotin

Application recommendation:
We recommend consulting your JOSERA feeding specialist before beginning supplementation.

- Start feeding 3 weeks before calving
- DairyAnion should be fed up until calving; 1–2 days before calving, switch to a mineral feed for lactating cows
- The dosage depends on the urine pH and the levels of Ca, P, Na, Cl, K, and S in the ration
- Unlimited access to fresh water must be ensured
- Cation-Anion Balance (DCAB): -6300 meq/kg

Feeding recommendation: 30 g/kg DM

9 kg DM ➡ 270 g
11 kg DM ➡ 330 g
13 kg DM ➡ 390 g

When determining the correct feeding amount, always consider not only the dry matter intake but also the DCAD value of the total ration.

Instructions for proper use:
This complementary feed has a higher content of Vit. A, Vit. D3 and trace elements than complete feed. Therefore, it may be fed to dairy cows in a quantity of 200 - 400 g per animal per day.

x) 50% B-Protect® (rumen protected-B-vitamins)

Composition:
encapsulated calcium chloride | calcium carbonate | magnesium sulfate heptahydrate | magnesium oxide | sodium chloride | mono-calcium-phosphate | wheat bran | sugar beet molasses

Analytical constituents:

18,50 %	calcium	1,50 %	phosphorus
3,00 %	sodium	8,00 %	magnesium
20,20 %	chloride	3,50 %	sulphur
12,50 : 1	Ca/P =		

Nutritional additives per 1 kg:

260.000,0 I.E.	vitamin A (3a672a)
80.000,0 I.E.	vitamin D3 (3a671)
3.000,0 mg	vitamin E/all-rac-alpha-tocopheryl acetate (3a700)
15,0 mg	vitamin B1 (3a821) x)
11,2 mg	vitamin B2 (3a825ii) x)
10,0 mg	vitamin B6/ pyridoxine hydrochloride (3a831) x)
75,0 mcg	vitamin B12 (3a835 / 3a836 / 3a837) x)
250,0 mg	niacinamide (3a315) x)
37,5 mg	calcium D-pantothenate (3a841) x)
3,0 mg	folic acid (3a316) x)
25.000,0 mcg	biotin (3a880) x)
1.300,0 mg	zinc (zinc chelate of glycine hydrate (solid)) (3b607)
1.300,0 mg	zinc (zinc oxide) (3b603)
620,0 mg	manganese (manganese chelate of glycine hydrate) (3b506)
620,0 mg	manganese (manganese (II) oxide) (3b502)
190,0 mg	copper (copper(II) chelate of glycine hydrate (solid)) (3b413)
190,0 mg	copper (copper(II) sulphate pentahydrate) (3b405)
40,0 mg	iodine (calcium iodate anhydrous) (3b202)
10,0 mg	cobalt (coated granulated cobalt(II)carbonate) (3b304)
6,0 mg	selenium (sodium selenite) (3b801)
6,0 mg	selenium (sodium selenite)(SeProtect®) (3b801)

Note: The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
