Josera.
we care, you grow

Easymil

Special acidified milk replacer

Main applications

- Group phase
- Igloo phase

Product features:

- whey powder
- combination of selected acids
- fully soluble components

Product advantages:

- can be used as a cold, acidified drink
- 24 hours stable against withdrawal
- inhibition of bacteria growth
- no separate acid additive required
- elevated protein digestion
- high protection against diarrhea
- suitable for the single-phase and multi-phase feeding

Your benefits:

- healthy calves and easy rearing
- lower calf losses
- easy to use
- less workload when feeding the calves

Easymil

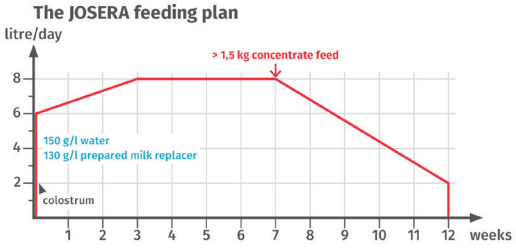

Special acidified milk replacer

Product features:
- whey powder
- combination of selected acids
- fully soluble components

Application recommendation:
150 g/l water correspond to 130 g/l milk replacer

Preparing the milk replacer in the bucket / milk taxi:
1. Put 1/3 of the required water amount with 45-50°C into the container (bucket, tank).
2. While stirring add the milk replacer – 130g/l milk replacer.
3. Add the remaining water (2/3). The drinking temperature of the complete milk replacer should be at 40°C.

Settings for the automatic feeder:
150g/l water correspond to 130g/l milk replacer

The weaning can be started as soon as the calf takes up 1.5 kg of concentrated feed.

Please pay attention to the following:
1. Clean and disinfect the boxes of the calves.
2. Use JOSERA Desan to decrease pathogenic germs.
3. Administer colostrum together with JOSERA Colostrin as soon as possible after birth. Approximately 4-6 l during the first 12 hours of life.
4. Clean equipment thoroughly.
5. Offer fresh water and JOSERA Kälberkost from the second day on.

Instructions for proper use:
This mixed feed must only be given to animals younger than 6 months.

Composition:
whey powder | whey powder, partly desugared | vegetable fat, refined (palm,cocos) | wheat protein, hydrolysed, soluble | whey permeate powder | pre-gelatinised wheat flour | chicory inulin

Analytical constituents:

21,58 %	crude protein	15,45 %	crude fat
0,07 %	crude fibre	8,30 %	crude ash
2,06 %	lysine	0,90 %	calcium
0,65 %	phosphorus	0,70 %	sodium

Nutritional additives per 1 kg:

25.770,0 I.E.	vitamin A (3a672a)
5.150,0 I.E.	vitamin D3 (3a671)
155,0 mg	vitamin E/all-rac-alpha-tocopheryl acetate (3a700)
258,0 mg	vitamin C (3a300)
16,5 mg	vitamin B1 (3a821)
8,3 mg	vitamin B2 (3a825ii)
6,2 mg	vitamin B6/ pyridoxine hydrochloride (3a831)
51,5 mg	niacinamide (3a315)
2,1 mg	vitamin K3 (3a710)
25,8 mg	calcium D-pantothenate (3a841)
1,0 mg	folic acid (3a316)
309,0 mg	choline chloride (3a890)
206,0 mcg	biotin (3a880)
82,5 mg	zinc (zinc chelate of glycine hydrate (solid)) (3b607)
72,0 mg	manganese (manganese chelate of glycine hydrate) (3b506)
103,0 mg	iron (iron(II) chelate of glycine hydrate) (3b108)
8,3 mg	copper (copper(II) chelate of glycine hydrate (solid)) (3b413)
1,0 mg	iodine (calcium iodate anhydrous) (3b202)
0,4 mg	selenium (sodium selenite) (3b801)

Zootechnical additives per 1 kg:
2,00 x10^9 KBE lactic-acid bacteria Enterococcus lactis NCIMB 10415 (4b1705)

Technological additives per 1 kg:
6.000 citric acid (1a330)

Note: The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
