# Extramil 50

Milk replacer with 54% milk powder (buttermilk/skimmed milk powder) without palm and coconut fat

**Application recommendation:**
150 g/L water corresponds to 130 g/L milk replacer solution

**For lambs:**
180–200 g/L water = 160–180 g/L milk replacer solution

**Preparation of the calf milk replacer in a bucket or milk taxi:**
1. Pour 1/3 of the required water volume at 40–45 °C into the mixing container.
2. While stirring continuously, add the powder – use 130 g per liter of prepared milk replacer solution.
3. Top up with the remaining 2/3 of the water to achieve the optimal drinking temperature of approx. 40 °C.

**Setting for the automatic feeder:**
150 g/L water corresponds to 130 g/L milk replacer solution

**Instructions for proper use:**
This mixed feed must only be given to animals younger than 6 months.

**Note:** The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
