CARE

KraftMix

Mineral feed for cattle for the production of home-made high-performance feed

Product features:
- sodium carbonate
- biotin
- rumen protected selenium (Se-Protect®)
- B-vitamins

Application recommendation:
You make best concentrates with own grains. First balance your forage mixture with mineral feed like Cami or Complett - Keragen Longlife®.

Secondly higher performances require a balanced concentrate mixture with a special suited mineral feed.

KraftMix fulfills exactly these requirements and is used with 3% in homemade concentrates.

Instructions for proper use:
Due to the higher levels of vitamin A, vitamin D3 and trace elements compared to complete feed, this complementary feed may only be used for dairy cows and young cattle at a proportion of up to 3% in farm-made performance feed.
