Phosphoreimer

Lick bucket for cattle for birth preparation and times of a higher phosphorus requirement

Main applications Rind

- preparation for birth
- lactation
- suckling cows

Product features:

- Ca/P relationship (0.5:1)
- high content of magnesium
- high vitamin-D3 level
- need-based supply of trace elements

Product advantages:

- effective protection from postpartum downer syndrome
- lower risk for placenta restrained
- easier birth
- fast recovery of the uterus
- high weather resistance
- high palatability

Your benefits:

- increased animal health
- positive effects for fertility and productivity
- more saleable milk

Phosphoreimer

Lick bucket for cattle for birth preparation and times of a higher phosphorus requirement

Product features:
- Ca/P relationship (0.5:1)
- high content of magnesium
- high vitamin-D3 level
- need-based supply of trace elements

Application recommendation:
a) For grazing cows on extensive and low phosphorus locations; also when feeding Ca-rich and P-poor feed (clover, mixed grass-clover, lucerne, rape)
b) for birth preparation of dry cows (3 weeks until 1-2 days before calving time)

Feeding recommendation:
for free intake up to 1% of daily feed ration:
dairy cows: 100 - 200 g
heifers: 60 - 120 g

Important:
The ingredients of Phosphoreimer support the mobilisation and utilisation of calcium to prevent a calcium deficit at the beginning of lactation. The risks of milk fiver, bad feed intake and downer cows is minimized.

This product does contain copper and is therefore not suited for sheep.

Instructions for proper use:
This complementary feed has a higher content of Vit. A, Vit. D3 and trace elements than complete feed. Therefore it must be given to cattle and horses until 1% of the daily ration.

10 g/kg TM

This product can be used for organic production acc. regulation (EU) 2018/848 and (EU) 2021/1165. It contains: • 15,0 % (dry matter) of feed materials from the organic production method • 0,0 % (dry matter) of feed materials from products in conversion to organic farming • 85,0 % (dry matter) of feed materials not covered by mentioned points • 15,0 % (dry matter) of animal feed of agricultural origin. Produces according to the regulations of Bioland e.V. Controlled by DE-ÖKO-060-control site.

Composition:
mono-calcium-phosphate | magnesium phosphate | sodium chloride | sugar cane molasses, organic | wheat semolina bran, organic | magnesium oxide

Analytical constituents:

5.00 %	calcium	10.00 %	phosphorus
8.00 %	sodium	7.50 %	magnesium
0.5 : 1	Ca/P =		

Nutritional additives per 1 kg:

650000 I.E.	vitamin A (3a672a)
120000 I.E.	vitamin D3 (3a671)
1500 mg	vitamin E/all-rac-alpha-tocopheryl acetate (3a700)
8000 mg	zinc (zinc oxide) (3b603)
4000 mg	manganese (manganese (II) oxide) (3b502)
1200 mg	copper (copper(II) sulphate pentahydrate) (3b405)
100 mg	iodine (calcium iodate anhydrous) (3b202)
22 mg	cobalt (coated granulated cobalt(II)carbonate) (3b304)
40 mg	selenium (sodium selenite) (3b801)

Note: The best before date requires hygienic, cool, and dry storage. Josera does not take responsibility for incorrect storage nor improper use.
